

INFORMATION SHEET OF THE SUBJECT

Code: SPM09		Name: Research II			
Cover: Department of Social Work					
Type of educational activity: Seminar, Practise				Number of credits: 6	Recommended semester: ST
Scope of educational activity (in hours): Weekly: 2/2 For term of study: LS 26,26					Study grade: Master
Method of educational activity:					
Recommended semester	Study programme				
1.year ST	Social Work (D2-SP-22) Social Work (D2-SP-22-K)				
Underlie subjects:					
Conditions for passing the course: Method of evaluation: Completion by taking an examination					
Continuous evaluation: Final evaluation: The final evaluation of the course consists of parts: a) Written / oral final examination, for which it will be possible to award a student max. 50% rating b) Making a recording of a qualitative interview and its subsequent transcription, for which it will be possible to award max. 20% rating c) Elaboration of an analysis of one research interview with the participant and its subsequent interpretation in the form of an analytical story processed in the research report, for which it will be possible to grant max. 30% rating: At least 95% must be obtained to obtain an A rating, at least 89% must be obtained to obtain a B rating, at least 83% must be obtained to obtain a C rating, at least 77% must be obtained to obtain a D rating, obtain at least 71% of the total rating. Finished: exam					
Learning outcomes: After completing this course, the student should be able to: - distinguish between qualitative and quantitative research strategy, - define the basic characteristics of qualitative research - know the methods of qualitative research - be familiar with the basic designs of qualitative research - describe the selection of the research package for qualitative research - know the basic methods of qualitative research - appropriately select and apply qualitative research methods with regard to the research problem - conduct an in-depth interview for research purposes and transcribe it independently - use basic analytical techniques for qualitative research - interpret qualitative data clearly and intelligibly.					
Schedule of subject: Qualitative research and its theoretical and methodological basis Quality criteria for qualitative research Ethical dimensions of qualitative research The course and planning of qualitative research Selection of a research group in qualitative research Data collection methods in qualitative research: observation, in-depth interview, focus groups, group interview, triangulation Basic overview of qualitative research designs Fundamentals of qualitative data analysis I.: Open coding Fundamentals of qualitative data analysis II.: Categorization Fundamentals of qualitative data analysis III.: Other general and analytical procedures - card unfolding technique, contrast technique. Interpretation of analytical data and skeleton of analytical story
